MINING NEWS

OHIO COPPER DAY'S FEATURE

Week Closes With Some Activity
and Big Gain in
One Stock

SALT LAKE, May 7.—At the closing session of the local mining stock exchange this morning Ohio Copper was the feature. Its shares sold up to \$2.25, a gain of 75 cents a share from the low point during the week's bargain sales. The reaction to a higher level does not come as a surprise to those who knew the true condition at the property, but there was some doubt as to the ability of the recovery of the shares so rapidly until it was known whether or not there would be any further liquidation. This was the only proposition that showed any strength and the trading was limited to the sale of 23,650 shares, for which the traders paid out \$7,989. During the past week the total sales amounted to 368,243 shares, the market valuation of which was \$141,367.23.

Some surprise was expressed at the weakness displayed in Colorado. This property has a large surplus, admitted to be in the neighborhood of \$200,000 or better. It is conceded that the company will doubtless post its dividend next month, but it is also claimed that the mine is shipping a much lower grade of ore and is not earning its dividends. Some interests claim that the company should not

deplete the treasury, but hold the money in reserve for further development. The closing quotations on the regular call were as follows:

JOHN METER HAS PLACER CLAIMS

J. G. Meter, formerly of Ogden, has arrived from Golden, Nevada, a new mining camp, in which he and

George Williamson, a former railroad man of Ogden, have located ten placer claims.

Mr. Meter has brought with him sacks containing 100 pounds of gravel which carries gold and is a fair sample of the dirt found on the claims. From a double handful of the gravel Meter panned out gold that was easily worth 25 cents. Besides the free gold, the gravel carries a quantity of black sand, which carries gold. The golden placers are situated in the Cloverdale canyon, and so far as known the ten claims located by Meter cover all the auriferous zone. The dirt is from two feet to seventeen feet in depth and underlaid by a cement hardpan. Some of the dirt will go as high as \$25 a yard and will pay to work.

Mr. Meter will remain in Ogden for a few days conferring with a number of old friends, and before leaving expects to interest a little Ogden capital in the claims.

SHORT SELLERS ARE ON THE RUN

Leading Longs Hold Whip Hand
and Control Things in
Wheat Pit

CHICAGO, May 7.—Short sellers were on the run in the wheat pit today. Leading longs had the whip hand, forcing covering on stop loss orders and doing considerable in the way of taking profits. The deferred futures closed 1-2a-3 to 3-4c up, and May 3-4c higher. Corn finished unchanged to 1-8c off, and

oats unchanged to a shade higher. Provisions showed 10c loss to 12 1/2c gain.

Except for a trace of uneasiness which came at the outset and was due to fine rains in the winter wheat country, a condition of nervous strength prevailed from the start to the finish. In the last half the bears were in a semi-panic condition. Liverpool was unofficially higher. The stock of contract wheat held here in public and private houses was reported not more than 2,500,000 bushels. September sold between \$1.02 7/8 and \$1.03 3/8, closing at \$1.03 1/4 to \$1.03 3/8.

Corn scored a fairly good early advance. The May-July difference is now under 2 cents as against a trifle more than 4c a week ago, when there was liquidation because of expected large deliveries.

September ranged from 63 3/4-63 7/8 to 64 1/4c, and closed at 63 7/8c.

Oats were a trifle firmer, helped by the advance in wheat. Trade was at a minimum. September closed at 38 5/8-38 3/4, precisely last night's price. In provisions pork closed 5 to 10c down, lard 2 1/2 to 5c up, and ribs 2 1/2c higher to 2 1/2-2a6c lower.
